Instructions for use

This test report serves to demonstrate the declared value of the equivalent thermal conductivity λ_D . The declared value can be used within the calculation acc. to prEN ISO 10077-2: 2011.

The declared value acc. to EN ISO 10456 doesn't represent the design value acc. to DIN V 4108-4. The determination of the design value has to take into account the national regulations.

Validity

The data and results given relate solely to the tested and described specimen.

Testing for thermal conductivity λ does not allow any statement to be made on any further characteristics relevant to performance and quality of the present construction.
